PROFILE SUMMARY

Results-driven Full Stack Developer with 2+ years of hands-on development experience in building scalable, high-quality web applications. Strong problem-solving and analytical abilities with a focus on developing reliable solutions, writing maintainable code, and delivering efficient applications. Passionate about continuous learning and adapting to modern technologies and development practices.

SKILLS

Languages: JavaScript, TypeScript

Web Development: HTML, CSS, React.js, Next.js, Redux, Bootstrap, Tailwind CSS, Framer Motion, Shadcn

Backend: Node.js, Express.js, NestJS, REST APIs, OAuth 2.0, Razorpay Integration, JWT Authentication, Socket.IO, OOPS, SOLID principle, Clean Architecture, Layered Architecture

Databases: MongoDB, PostgreSQL, Redis, Firebase Firestore, Firebase Authentication

DevOps & Monitoring: Docker, Grafana, Prometheus, Loki, GitHub Actions, CI/CD pipelines

Tools & Version Control: Git, GitHub, Postman, Figma, Canva, Eraser, npm

Deployment: Vercel, Render, Cloudinary, AWS

EXPERIENCE

Software Developer

April 2026 – July 2026

Madariz Impex Pvt. Ltd., Kochi

- Contributed to the development and enhancement of a **School ERP System** with advanced academic and administrative features.
- Developed and maintained **full-stack application features**, improving system efficiency and usability.

Intern Full Stack Developer

August 2024 – December 2025

Brototype, Kochi

- Developed **full-stack web applications** and implemented frontend, backend, API, and database features.
- Built scalable and maintainable solutions while debugging and optimizing application functionality.

PROJECTS

RYDIO — Platform for Renting & Booking Vehicles

[GitHub](#) | [Live Link](#)

A scalable full-stack vehicle rental platform with ID-verified authentication, advanced search, live chat, notifications, and admin controls. Designed with Clean Architecture and SOLID principles for maintainability, and modern UX for a smooth user experience.

- Authentication & Security:** JWT-based login and registration with refresh tokens and **Redis-powered token blacklisting**.
- ID Verification Workflow:** Mandatory ID proof upload before allowing users to list vehicles.
- Admin Dashboard:** Approval management, user blocking, and vehicle owner detail viewing using modal-based UI.
- Location-Based Listings:** Implemented **MongoDB Geospatial Indexing** for nearby vehicle suggestions, distance-based sorting, and browser location detection.
- Live Chat & Notifications:** Real-time user-to-owner communication with instant notifications.
- Deployment & CI/CD:** Frontend hosted on **Vercel** and backend deployed on **AWS**, with automated build and deployment pipelines using **GitHub Actions**.

ShutterCart — E-commerce Platform for Photographers

[GitHub](#) | [Live Site](#)

Full-stack e-commerce platform for photographers with smart discounts, advanced filters, and performance optimization.

- **Advanced Filtering System:** Enabled multi-criteria search by category, brand, price range, and stock status using optimized backend queries.
- **Smart Offers Engine:** Designed and implemented logic to automatically apply the best available discount at both product and category levels.
- **Performance Optimization:** Improved response times using pagination, **MongoDB indexing**, and optimized search queries for a smooth user experience.

MINI PROJECTS

Film Production Management System

[GitHub](#) | [Live Link](#)

A full-stack film production management platform built with **Next.js** and **NestJS**, streamlining production workflows including project management, Cast & Crew, locations, costumes, budgets, onboarding, RBAC, and audit management.

- **Core Features:** Production and project management, **Cast & Crew management**, **character assignments**, **user onboarding**, **budgets**, **fund requests**, **locations**, **bookings**, **costume inventory**, and **audit logs**.
- **Security:** Role-based access control (**RBAC**), authentication, permission-based access, project-level authorization, onboarding approvals, and audit tracking.
- **Architecture:** Organized using a **feature-based, modular architecture** with reusable components, custom hooks, service-layer API integration, shared utilities, and strongly typed TypeScript models.
- **Technology Stack:** **React.js**, **Next.js**, **TypeScript**, **Node.js**, **NestJS**, **MongoDB**, **Mongoose**, **REST APIs**, **JWT**, **Tailwind CSS**, **Jest**, and **E2E Testing**.
- **Quality & Performance:** Designed with **SOLID**, **DRY**, and **separation-of-concerns principles**, optimized database operations, and comprehensive automated testing with **203/203 E2E tests passing**.

URL Shortener — Secure Link Management Platform

[GitHub](#)

A modern full-stack URL shortening application that allows authenticated users to generate, manage, and track short links. Designed with a secure authentication flow, clean backend architecture, and a responsive, animated user interface.

- **Authentication & Security:** Implemented JWT-based authentication with protected routes, **bcrypt** password hashing, token verification middleware, and persistent sessions using **Redux Persist**.
- **URL Shortening & Redirection:** Converted long URLs into short, shareable links with duplicate URL detection and automatic redirection.
- **Click Analytics:** Tracked URL access history with timestamps, securely stored and managed using **MongoDB**.
- **Frontend & UX:** Built using **React 19**, **TypeScript**, **Vite**, **Tailwind CSS**, and **Framer Motion** with a dark-themed, responsive interface.
- **Backend Architecture:** **RESTful Express.js** API using **TypeScript**, **Mongoose**, and **Repository Architecture** for clean, maintainable code.

EDUCATION

MERN Stack Development

Brototype, Kochi

August 2024 – December 2025

[Certificate](#)

Higher Secondary in Computer Science

MES HSS Ponnani

July 2021 – March 2024
